PVC Drainage Droppers

TECHNICAL DATA SHEET

Enduroflex TDS Sept 2025

FUNCTION

The PVC drainage droppers is designed to connect prefabricated synthetic PVC roofing felts with rain water drains. They are fitted with a smooth flange to improve welding to the prefabricated PVC roofing felts; they have two rings on the shank which acts as drain trap seals between the drain connector and the rain water drain. A slightly conical shape to enable installation in rain water drains.

COMPATIBILITY

They are compatible with prefabricated PVC felts

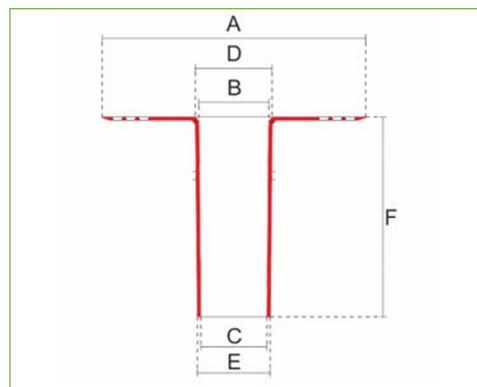

PERFORMANCE

Resistant to deterioration by the sun, ozone and other agents or chemicals normally found in the atmosphere. They have excellent flexibility even at low temperatures. The mechanical properties are maintained in the long term.

Operating: -20°C; +70°C

Material: PVC

Recyclable Product: Yes

SPECIFICATIONS

LINE ITEM	DESCRIPTION	A	B	C	D	E	F
120-040-240-030	PVC DRAINAGE DROPPERS Ø 30 SMOOTH FLANGE	235	26	24	33	29	243
120-040-240-090	PVC DRAINAGE DROPPERS Ø 90 SMOOTH FLANGE	320	91	87	97	92	243

ADDITIONAL INFORMATION

We recommend the gully and roofing felt be carefully cleaned before welding.
